

## CHARACTERISTICS OF DEVITA COMBI:

- includes 4 units: AP, Ritm, QUANT, HV,

- can work in both single mode (electromagnetic, quantum, electrotherapy) and combination mode: Ritm + QUANT, or Ritm + HV

- has a built-in database of complexes and programs for each unit

- has a function that allows you to create your own complexes from the existing programs in the database or create your own unique programs

- existing complexes and programs can be edited

- if required, any complex can be transferred to a hard copy (printed)

- convenient and simple in operation, compact in size, lightweight, portable

- can be applied both in professional environments and at home. Can be used for both humans and specific animals

- has unique programs designed for the following animals: cats, dogs, horses and cows

You will achieve the most effective result by combining different types of exposure to the DeVita Combi device.

## COMPREHENSIVE EFFECT

### DEVITA COMBI

A VERSATILE 5-IN-1 COMBINATION DEVICE

It can simultaneously work as the DeVita AP, DeVita Ritm, DeVita Cosmo and for electrotherapy in STEP and RAMPING modes. It can be used in cosmetics, in health and wellness rooms, relaxation rooms and at home.

Harmonises the functioning of organs and body systems, restores and maintains homeostasis in the body's physiological systems. Maintains muscle tone, preserves youth. Strengthens immunity, improves memory, and relieves eye fatigue.

Protects against colds, helps cleanse the body of pathogenic forms of bacteria, viruses, fungi, and parasites. Improves the drainage function of the lymphatic system and effectively relieves the body of toxic loads.

Eliminates inflammatory reactions, relieves pain and muscle tension, has a calming effect, improves tissue nutrition, promotes active regeneration.

**VERSATILITY**  
A device for wellness of the whole body

**EFFICACY**  
Effective technology used by leading scientific organisations

**SIMPLICITY**  
Easy to use

**SAFETY**  
Safe to use with minimal contraindications

**PORTABILITY**  
Conveniently and easily portable

**EFFECTIVITY**  
Effectively maintains health, beauty and youth

DeVita-technologies are the fastest, easiest, most reliable and modern way to improve your health

REGULATORY EFFECT

The DeVita Ritm unit has a regulatory effect. This effect is based on research by scientists R. Voll, H. Schimmel, A.F. Kramer and others. According to these distinguished scientists' studies, each organ has its own spectral signature. The oscillations of weakened organs differ from healthy ones. The Ritm's low-intensity bioresonance frequencies mimic the vibrations of healthy organs and so 'retune' the body to match these healthy oscillations.

This method is based on the ability of the living organism to respond selectively to extremely low-intensity radio frequencies. Under the influence of radio frequencies, a transfer of frequency is activated through cell membranes and basic bioenergetic processes, which enables the body to deal with any problem that arises.

ANTIPARASITE EFFECT

The DeVita AP unit has the ability to neutralize pathogens. This important function is based on research carried out by R. Rife and his followers. These distinguished scientists have proved that every living form has its own spectral signature. Waves of a certain frequency, which are identical to the resonant frequency of the pathogenic microorganisms, are reproduced by the device and are delivered into the organism in a square wave form, creating intense oscillations that contribute to the elimination of infectious agents and parasites.

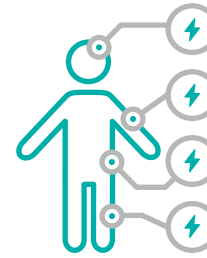

In this case, the device will generate frequencies characteristic of certain types of viruses, bacteria, helminths, protozoa and fungi... and in addition, enable a deep cleansing of the body from toxins.

QUANTUM EXPOSURE

This is carried out by means of the QUANT unit. The device emits frequencies characteristic of electromagnetic regulatory effects, infrared light and light waves in 4 spectral colors of visible light.

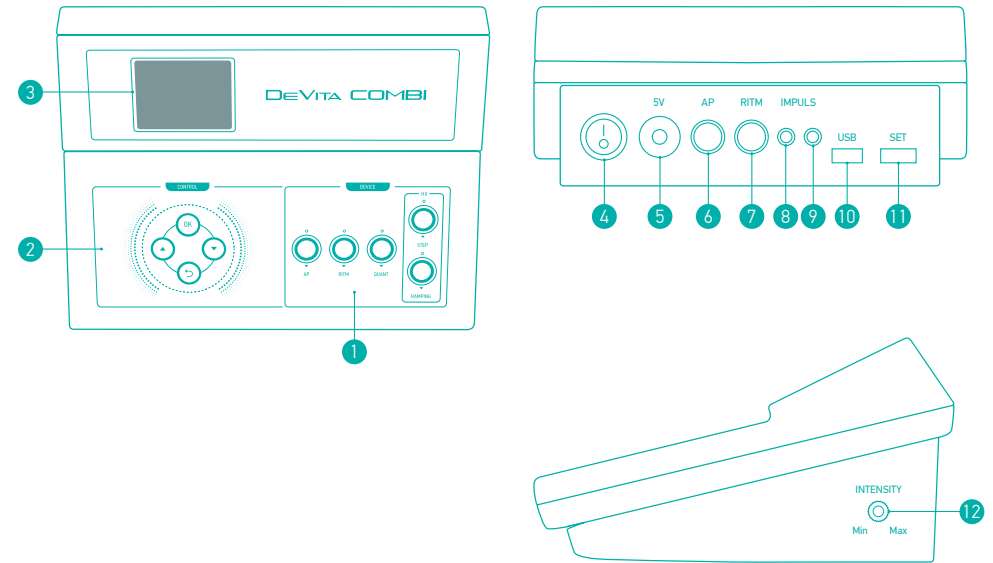

The healing effect of color/light is applied to the skin in the area of reflex zones. For these purposes, the Zakharyin Head zones are used. These are zones on the face, feet and palms described by traditional Chinese medicine. Each zone on the human body is directly or indirectly related to a particular organ or system of organs and their functioning. The impact on these zones and underlying tissues changes the tone and effectivity of the vessels of the microcirculatory system, the metabolism of dermal cells, and also activates the level of metabolic processes of all skin layers and subcutaneous fatty tissues. Stimulation of the sensory receptors of the skin, the mucous membranes and the underlying tissues, affects the functional systems of the body, via the nervous system, providing regenerating, toning, rejuvenating and antidepressant effects.

ELECTROTHERAPY EXPOSURE

Electrotherapy is carried out by means of the HV STEP and HV RAMPING units. Weak discharges of electric current (pulsed currents) affect biologically active points (BAP) or reflex zones located on different parts of the body. These reflex zones relate to internal organs. When these zones are stimulated, a reflex mechanism is triggered in the body, which helps to engage the activity of nerve endings, vascular networks and activate biochemical processes. This all leads to the reduction of pain, the improvement of microcirculation and the initiation of healing processes.

ILLUSTRATION OF THE DEVICE

1. Control Panel "DEVICE MODES"
2. Control and navigation buttons "CONTROL"
3. Display
4. ON/OFF power switch
5. Socket for external power supply
6. AP antenna unit connector
7. RITM antenna unit connector
8. Black electrode connector port ("minus") for the HV unit
9. Red electrode connector port ("positive") for the HV unit
10. Micro-USB port - for connection to a computer.
11. SET USB A connector process connector for setting the bluetooth address of the QUANT unit.
12. Potentiometer "INTENSITY" - pulse amplitude control knob in HV mode
